All ILC products must only be used for their intended purposes, as specified in this brochure and in all instructions. If the product is supplied together with user instructions, the user is required to read them and comply with them. Not all lubricants are suitable for centralised lubrication systems. ILC lubrication systems or relative components cannot be used together with gas, liquid gas, pressurised gas in solution and liquids with vapour pressure exceeding normal atmospheric pressure (1013 bar) by more than 0.5 bar, maximum temperature permitted. Any type of dangerous materials, namely those classified as such by European Community Directive (EC) 67/548/EEC, Article 2 (2), can only be used in ILC centralised lubrication systems or relative components upon consultation with ILC and after having received written approval from the company.

Description

MPT electric pumps are designed to supply oil or soft grease lubrication systems where volumetric metering valves are installed. The pump motor unit is applied to a sheet-metal angle plate acting as a cover of the tank. A valve unit is applied to the gear pump, which performs the priming (automatic air purge during the start-up stage) – decompression (automatic pressure release in the circuit at the end of the working cycle) and safety (automatic lubricant discharge inside the tank when the maximum working pressure is reached) functions. Minimum level electrical warning and a pressure gauge are also installed, while the intake filter and the load filter are for the Oil version only.

Operation

At the end of the pause cycle set, the supply voltage is sent to the pump motor, thus starting the work cycle. In this stage, the electric pump delivers the preset flow rate to the volumetric metering valves that send the lubricant to the various points of the machine. At the end of the working time set, the electric pump stops and, at the same time, it must be checked whether the end-of-line pressure switch has sent the contact closure signal. At this point, the lubrication cycle is complete. Once the electric pump stops, the pressure release stage begins in the circuit, which allows the metering valves to be filled. Further lubrication cycles will be repeated according to the pause time set. Additional cycles can be performed by activating the manual button.

Any anomalies such as lack of lubricant in the tank, insufficient working pressure and failure to release pressure at the end of the working cycle can be reported.

Motor

The MPT series electric pumps have a standard configuration that has a three-phase motor. It is possible to supply single-phase motors 115 VAC, 230 VAC 50/60 Hz or motors with special voltages.

For orders with motors of different voltages, add the voltage value to the relative code, for example **60.821.0** becomes **60.821.0.230**.

Three-phase	A94.150053	
Power supply voltage	Frequency	Absorption
220-240/380-420	50 Hz	0.64–0.74/0.37-0.46 A
254-280/440-480	60 Hz	0.64–0.74/0.37-0.46 A

General features	
Power	90 W
Protection rating	IP55
Service	Continuous S1
Insulation	Class F
Construction shape	B14
Size	Mec56

The three-phase motor is supplied with a star electric connector

Single-phase	A94.150054 / A94.150054		
Power supply voltage	Frequency	Absorption	Code
115 V AC	50/60 Hz	2.2 A	A94.150053
230 V AC	50/60 Hz	0.9 A	A94.150054

MPT-200

Polypropylene Tank

The flow rate and pressure performance of these pumps make them ideal for small and medium installations.

Flow Rate / Minute	100 cc
Operating pressure	5 - 25 Bar (70-354 PSI) adjustable
Release valve	0.7 Bar
Tank Capacity	2 - 3 - 6 L
Intake filter	250 micron
Pressure gauge	0 - 60 BAR / 0 - 870 PSI
Delivery fitting	M12X1 Pipe 6mm
Operating temperature	FROM -20°C TO +80°C
Lubricants	OILS 50 - 1000 cSt 40°C
Minimum electric level	1.5 A 250V AC 200V DC 50 W

Models and Dimensions								
Code	Ltr	A	B	C	D	E	F	Weight
60.821.0	2	160	186	340	128	158	148	4.8 kg
60.821.1	3	155	181	335	167	165	230	5.3 kg
60.821.2	6	250	276	430	167	165	230	5.5 kg

MPT-200 LAM

Sheet Metal Tank

The flow rate and pressure performance of these pumps make them ideal for small and medium installations.

Flow Rate / Minute	100 cc
Operating pressure	5 - 25 Bar (70-354 PSI) adjustable
Release valve	0.7 Bar
Tank Capacity	5 - 8 – 12 - 50 L
Intake filter	250 micron
Pressure gauge	0 - 60 BAR / 0 - 870 PSI
Delivery fitting	M12X1 PIPE 6mm
Operating temperature	FROM -20°C TO +80°C
Lubricants	OILS 50 - 1000 cSt 40°C

Minimum electric level	1.5 A 250V AC 200V DC 50 W
------------------------	----------------------------

Models and Dimensions								
Code	Ltr	A	B	C	D	E	F	Weight
