Proven Field Service – with over 28 years of service, Yamada has sold over 100,000 units.

Many major heavy construction equipment manufacturers sell the KPL-24 as an option on their machinery.

Follower Plate – metal construction with Buna N wiping seals allowing for a straight or tapered 5 gallon pail.

Unit Weight – weighing in at 26 lbs., the KPL-24 is 35% lighter than the major competitor. This allows for easier portability and greater stability when the pail is close to empty (no tipping issues).

Product has been in the marketplace for under 5 years!!

Follower Plate – One solid piece of Buna N that is fastened to the coupling with wood screws – This design will wear faster and the screws present another potential problem area.

Unit Weight – weighing in at 35 lbs., this unit is much heavier than the KPL-24 and may tip over when pail is close to empty; held to pail with bungee cords.
